Platform Feature Guide

Rider App · Driver App · Admin Panel

A complete overview of everything the GenXTaxi ride-hailing platform offers.

October 2026

1. Platform Overview

GenXTaxi is a complete ride-hailing platform made of three connected products that work together in real time:

Product	Who uses it	Purpose
Rider App (iOS & Android)	Passengers	Book rides, track the driver, pay, rate and manage their account
Driver App (iOS & Android)	Drivers	Receive ride requests, navigate, complete trips and track earnings
Admin Panel (web)	Operations team	Run the marketplace: monitor rides live, manage drivers, pricing, promotions, payouts and safety

How a ride works

1. **Request** — the rider chooses pickup and destination, sees the fare, and books.
2. **Match** — the nearest available driver is offered the trip; if declined or missed, the next driver is tried automatically.
3. **Pickup** — the rider sees the driver, car and a 4-digit safety code; the driver confirms the code to start the trip.
4. **Ride** — both sides follow the trip live on the map.
5. **Complete** — fare breakdown, payment, receipts, and ratings for both rider and driver.
6. **Operate** — every step is visible to the operations team in the Admin Panel.

Highlights

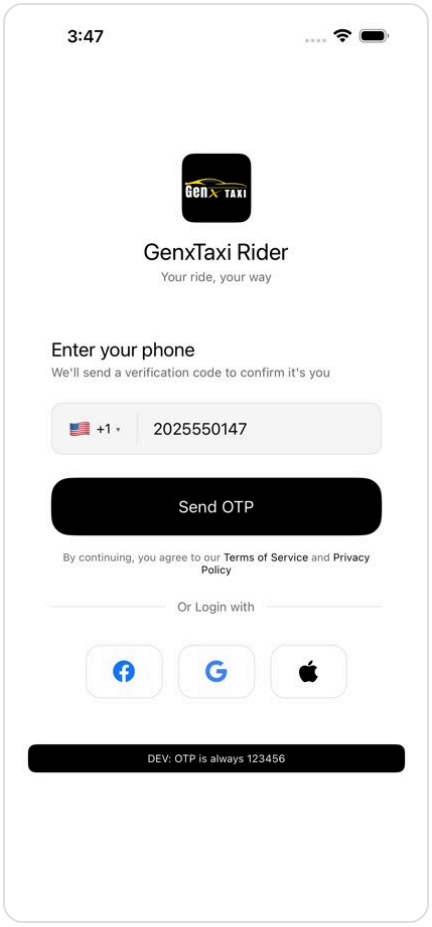

- Real-time booking, dispatch and live tracking
- Safety-first: pickup code, SOS button, emergency contacts, live SOS alerts to operations
- Flexible pricing: ride types, promo codes, surge zones, driver subscriptions or commission
- Full operations control: live map, driver approval, payouts, analytics and reports
- AI-powered support assistant and driver insights
- Light and dark themes; multi-language support (English, French, Arabic with right-to-left layout)

2. Rider App

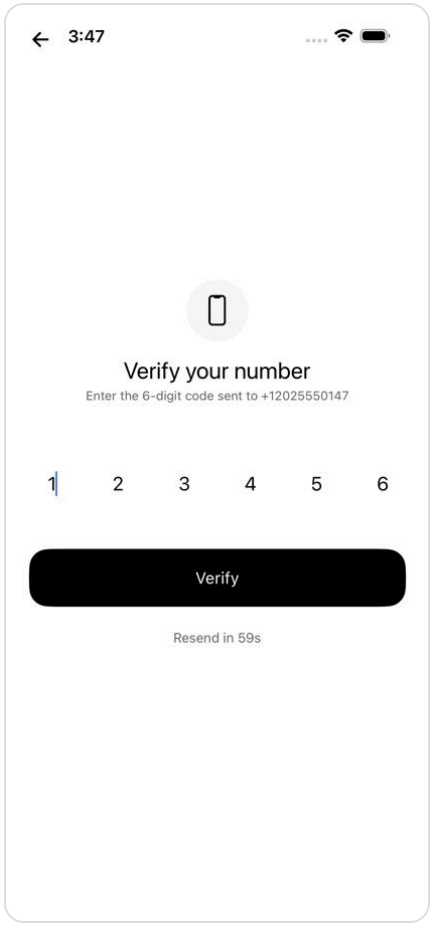

A clean, map-first experience that gets a rider from opening the app to a confirmed ride in a few taps.

2.1 Sign-up and login

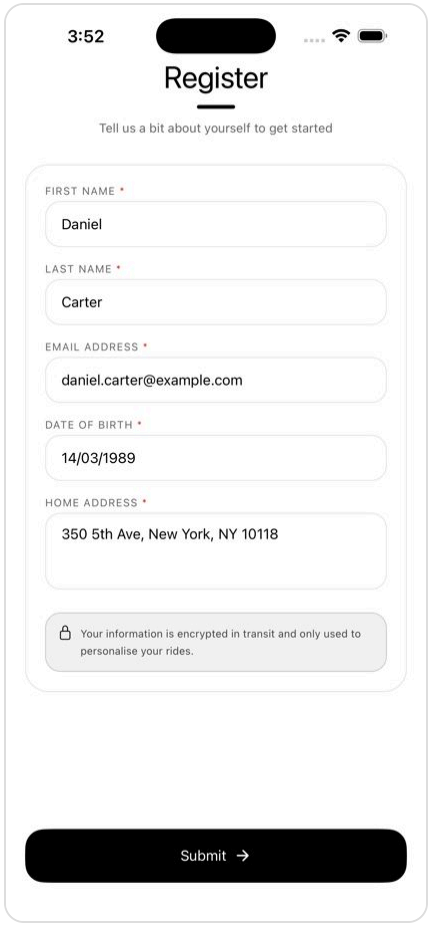

Feature	What it does
Phone number login	Sign in with a mobile number and a one-time code (OTP); country selector included. Social sign-in is also supported.
Quick registration	New riders enter name, email, date of birth and address once.

Phone number entry

One-time code

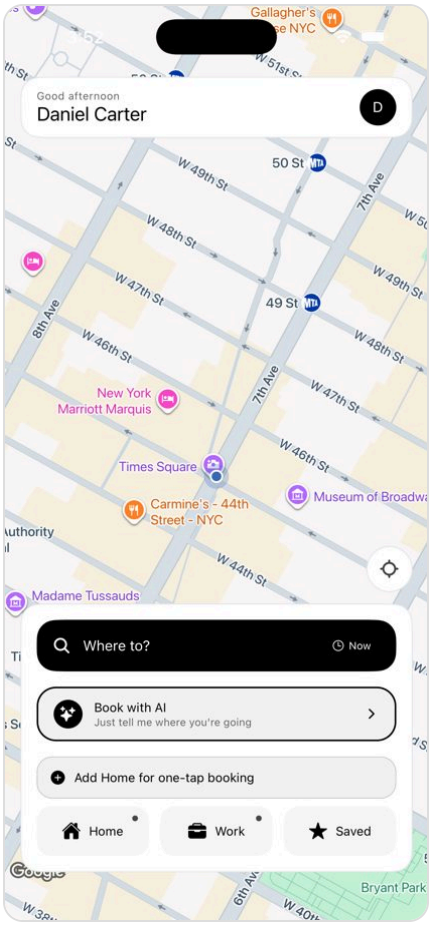

Profile registration

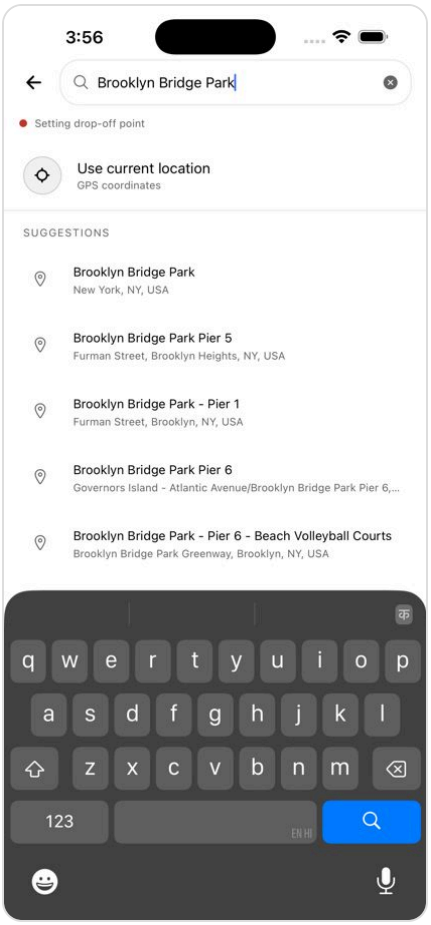

2.2 Booking a ride

Feature	What it does
Live map home	Shows the rider's location and nearby area; pickup is filled in automatically.
Place search	Search for destinations and pickup points with address suggestions.
Saved places	One-tap Home, Work and custom favourites.

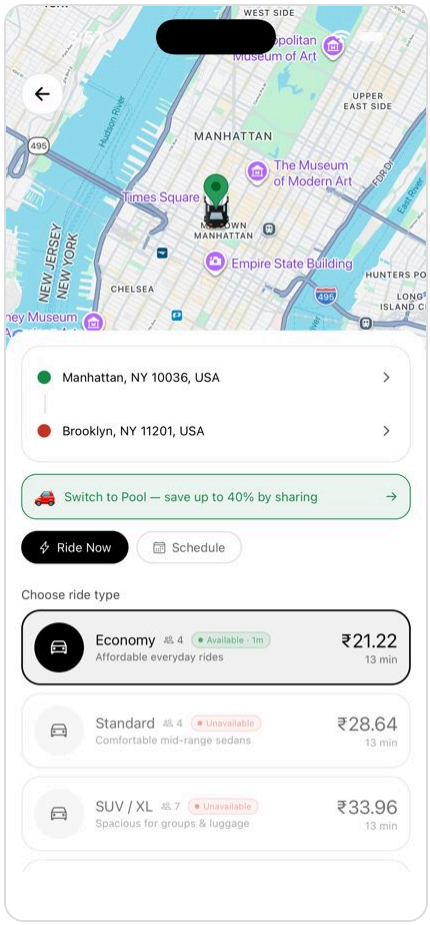

Ride types & fare estimate	Choose a ride category and see price and arrival time before booking.
Promo codes	Apply a promo code and see the discount instantly.
Payment choice	Cash, card or wallet.
Surge notice	Clear notice when high demand raises prices in an area.
Schedule & pool options	Book now or schedule; shared-ride option to save money.

Finding your driver

2.3 During the ride

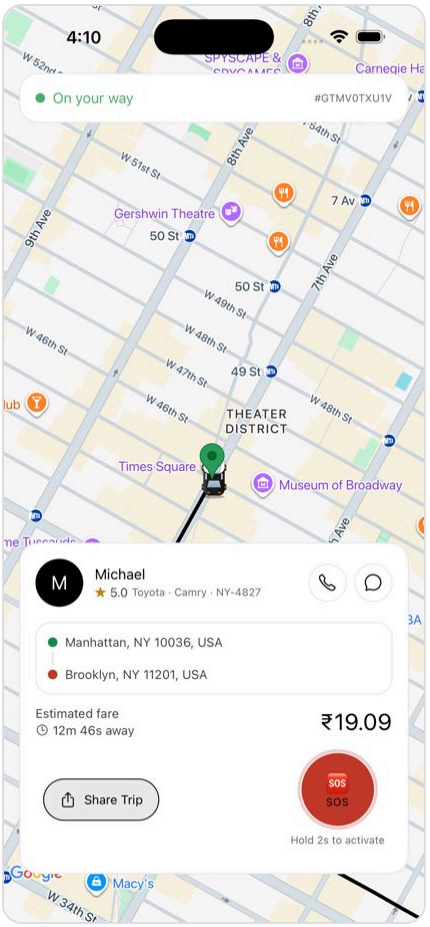

Feature	What it does
Driver details	Driver name, rating, car model, plate number and live ETA.
Pickup safety code	A 4-digit code the rider shares with the driver so only the right passenger starts the trip.
Live tracking	Follow the driver to the pickup and then the trip on the map; arrival notification.
Call & chat	Contact the driver in-app (masked calling protects phone numbers).
Share trip	Send a live trip link to family or friends.
SOS	Hold the SOS button to alert the operations team and emergency contacts with live location.
Cancel with clear fee	Rider is shown any cancellation fee before confirming.

2.4 After the ride

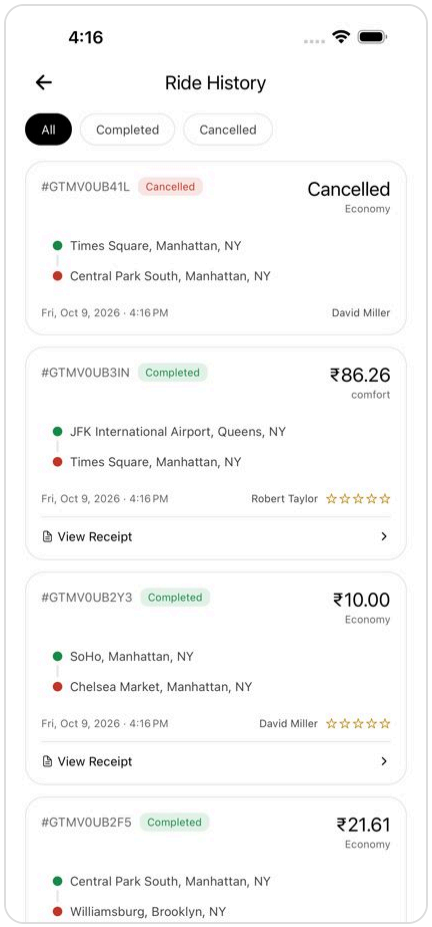

Feature	What it does
Fare breakdown	Base fare, distance, time, promo discount and total.
Rate your driver	Star rating, quick tags (punctual, friendly, safe...) and a written review.
Ride history & receipts	Every past and cancelled trip with a detailed receipt that can be shared.

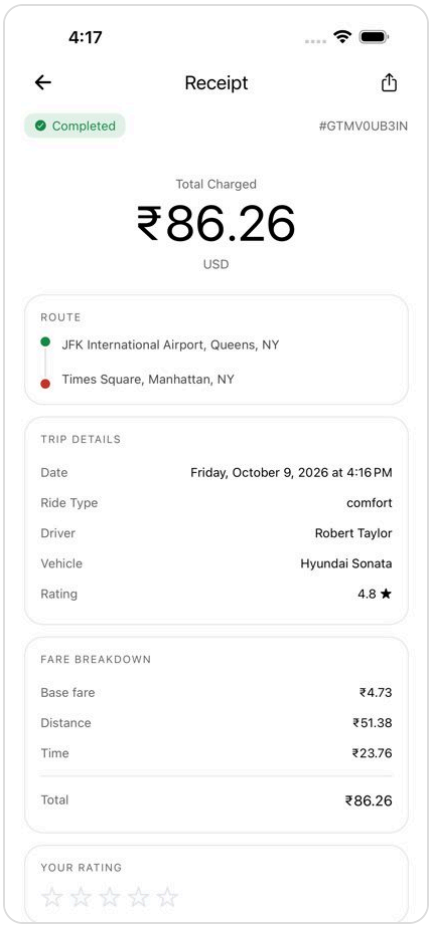

Trip completed

Rating and review

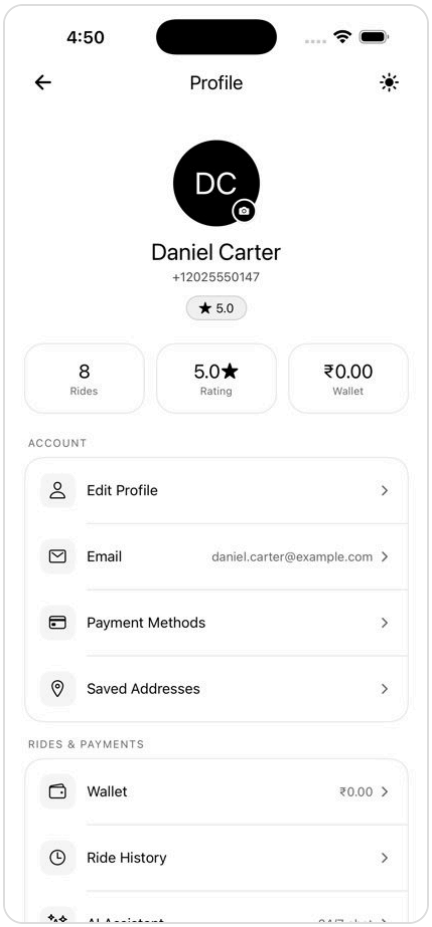

Ride history

2.5 Account, safety and support

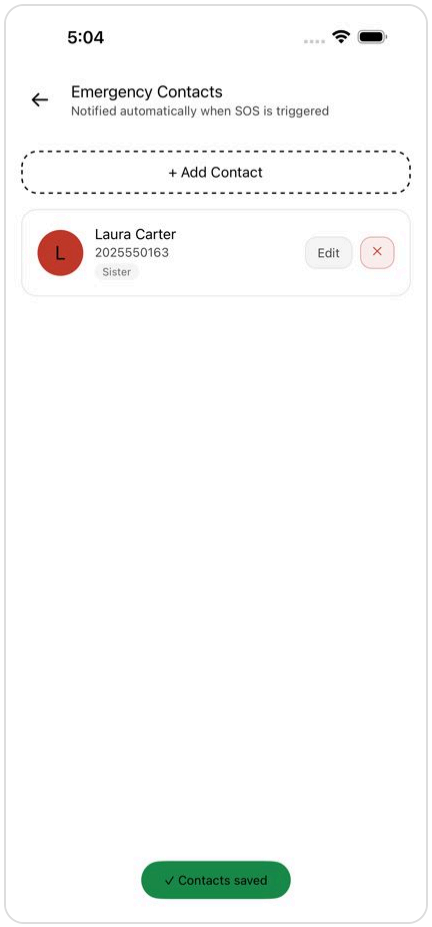

Feature	What it does
Profile	Edit personal details; rides, rating and wallet at a glance.
Wallet	In-app wallet with balance, top-up and transaction history.
Saved addresses	Home, work and favourite places.
Emergency contacts	Trusted people who are alerted if SOS is triggered.
Notification preferences	Choose which ride, promo and account alerts to receive.
Help & support	Email, phone, FAQs and an AI support assistant that can answer questions and help with bookings.
Terms & privacy, dark mode	Legal pages in-app and a light/dark theme.

3. Driver App

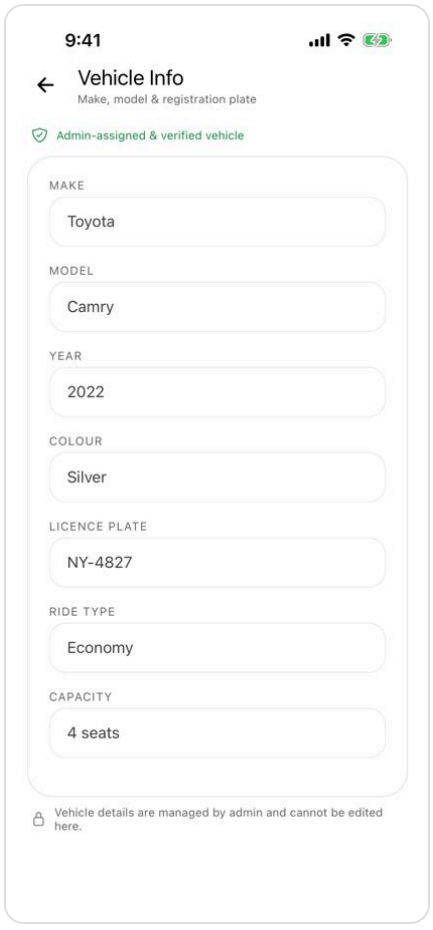

Built for drivers on the move: large controls, clear request cards and transparent earnings.

3.1 Onboarding and profile

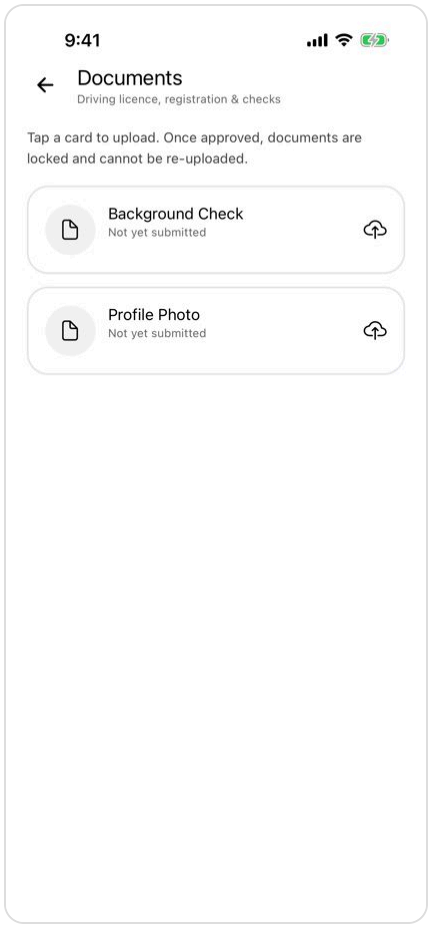

Feature	What it does
Phone login	Secure OTP login.
Document upload & verification	Drivers upload licence, registration, insurance and background check; the operations team reviews and approves before they can drive.
Vehicle information	Make, model, year, colour and plate, managed and verified by the operations team.
Profile	Personal details, rating, rides completed and online hours.

3.2 Going online and receiving rides

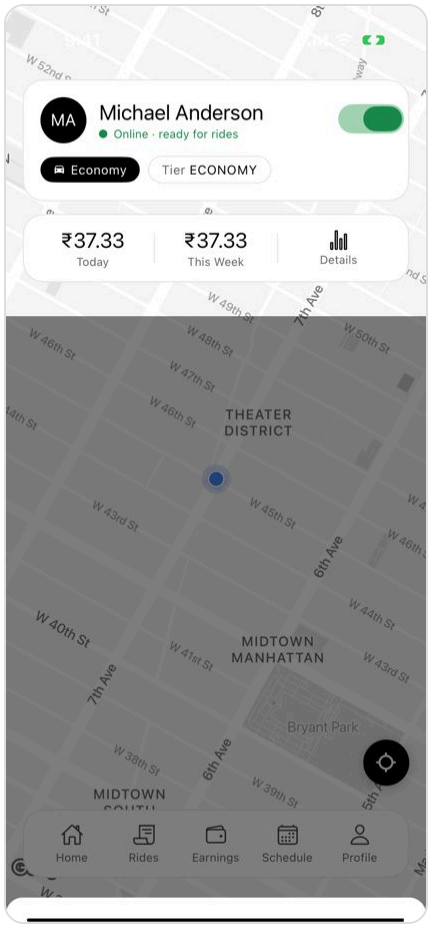

Feature	What it does
Online / offline switch	Drivers choose when to receive requests, with today's and this week's earnings on the home screen.
Ride requests	Pickup, drop-off, fare, distance and duration with a countdown to accept or decline.
Scheduled availability	Set weekly hours and quick presets (weekday mornings, evenings...).
Surge zones	High-demand areas are shown so drivers can position themselves.

3.3 Running a trip

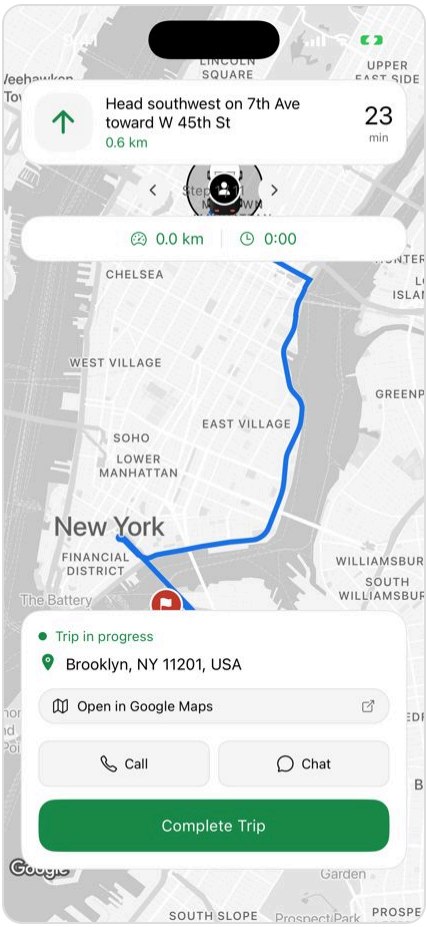

Feature	What it does
Navigation to pickup	Turn-by-turn directions, plus one-tap hand-off to Google Maps.
Arrived & safety code	Driver marks arrival and enters the rider's 4-digit code.
Start / complete trip	Confirmation prompts prevent accidental taps.
Call & chat	Contact the rider in-app with masked calling.
Trip summary	Immediate earnings breakdown after each trip, then rate the passenger.

3.4 Earnings, wallet and subscriptions

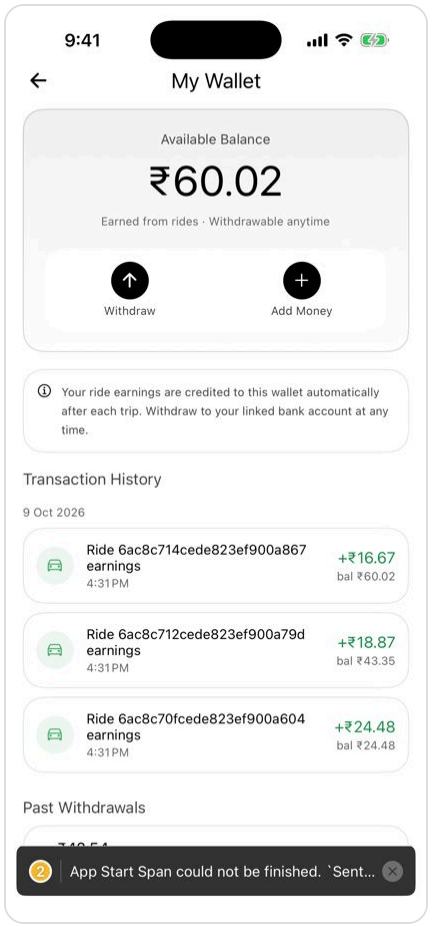

Feature	What it does
Earnings dashboard	Today, week, month and all-time earnings with per-trip breakdown, tips, bonuses and average per ride.
Ride history	All trips with route, distance, duration and fare.
Wallet & withdrawals	Earnings credited to a wallet; request withdrawals and see past payouts.
Subscription plans	Pay a fixed weekly or monthly fee for zero or reduced commission instead of per-trip commission.
Notifications, help & support, AI insights	Ride alerts, support contacts, and an AI-generated summary of rider feedback.

4. Admin Panel

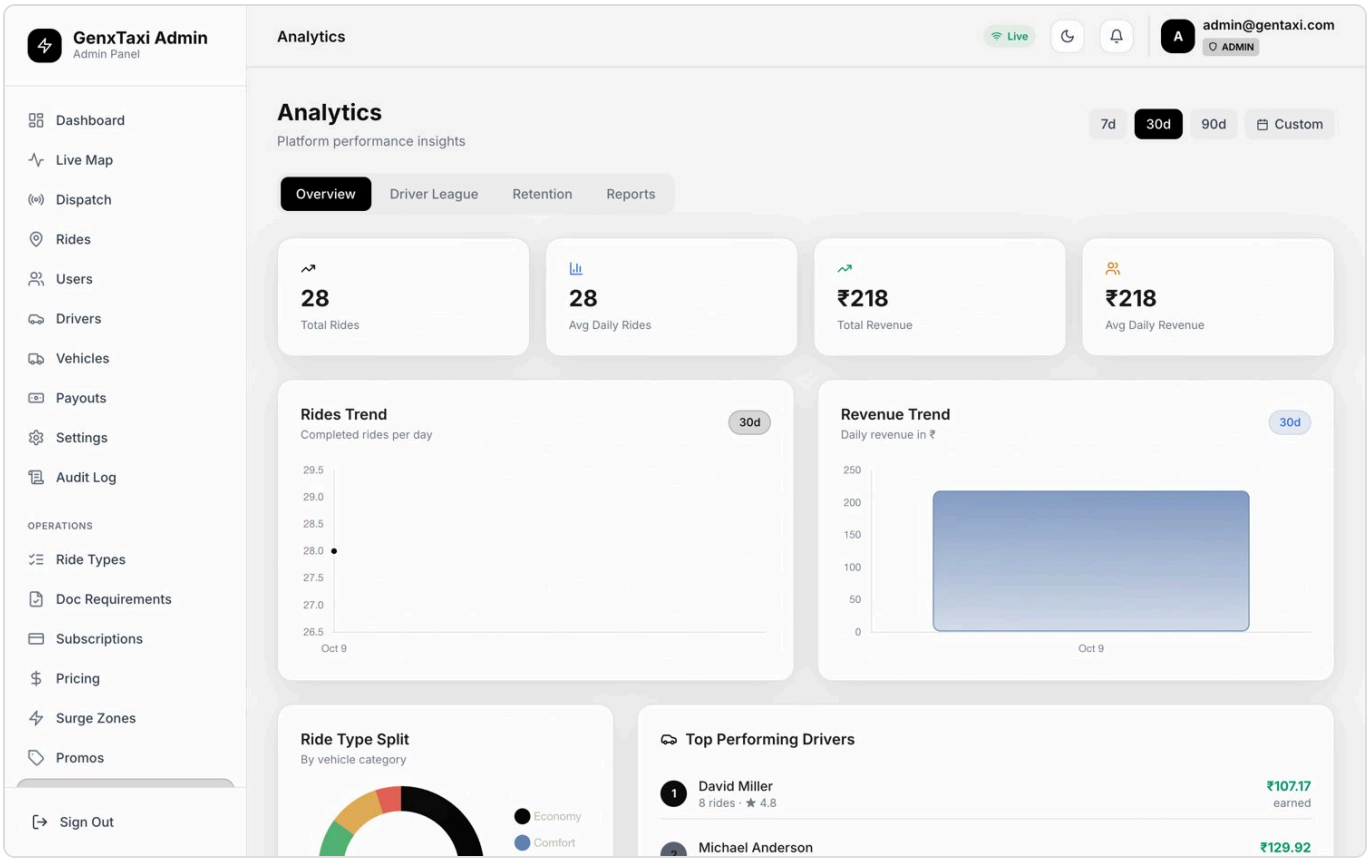

A web dashboard that gives the operations team full visibility and control of the marketplace.

4.1 Monitoring

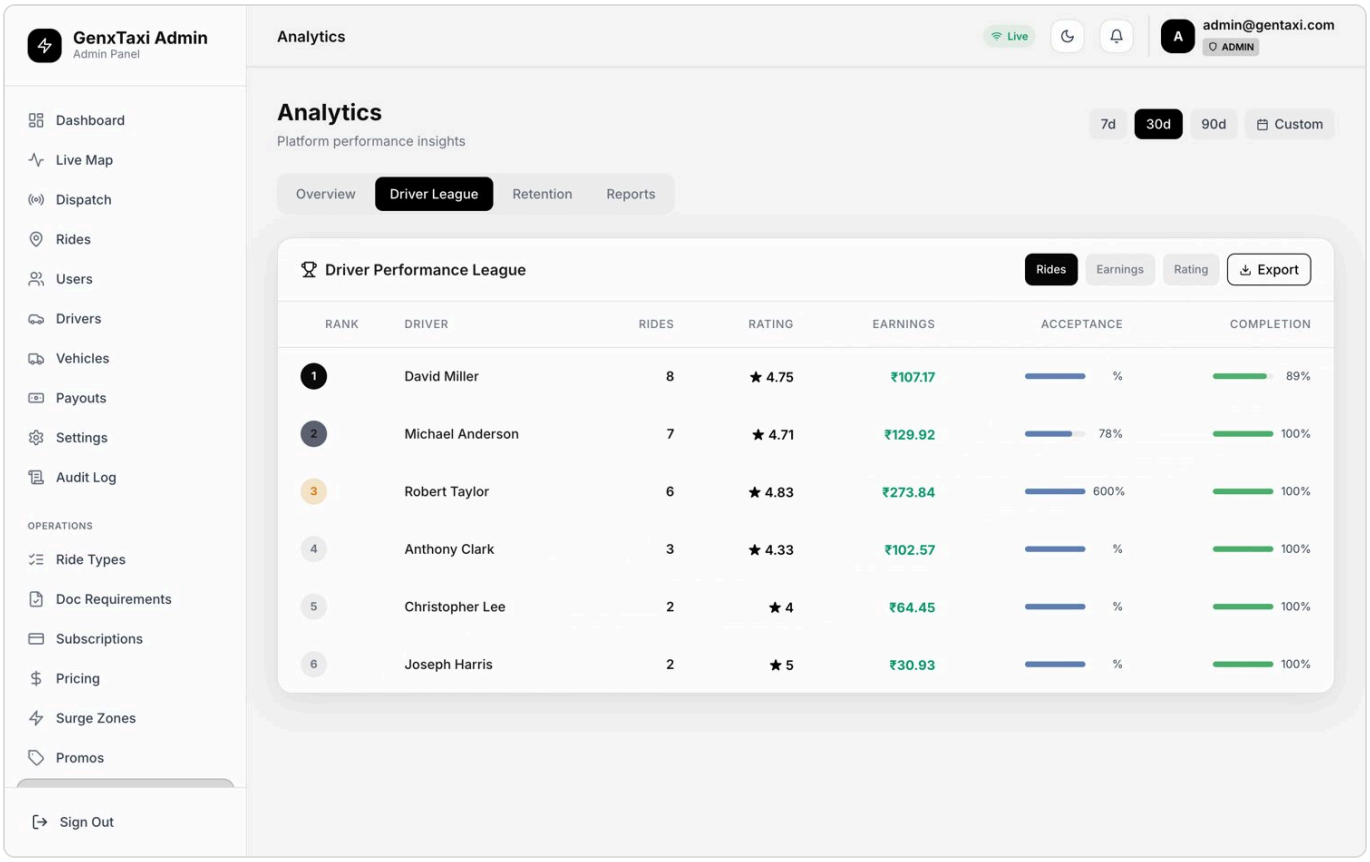

Feature	What it does
Dashboard	Live KPIs: active rides, online drivers, revenue today, pending driver approvals, SOS alerts, total users, drivers and trips, with daily charts.
Live map	Real-time view of active rides and drivers across the city, plus SOS alerts.
Dispatch	Create bookings on behalf of riders (phone or walk-in) and see online drivers.
Analytics & reports	Rides and revenue trends, ride-type split, driver league table, retention, and exportable reports (CSV / PDF).

Dispatch

4.2 People and fleet

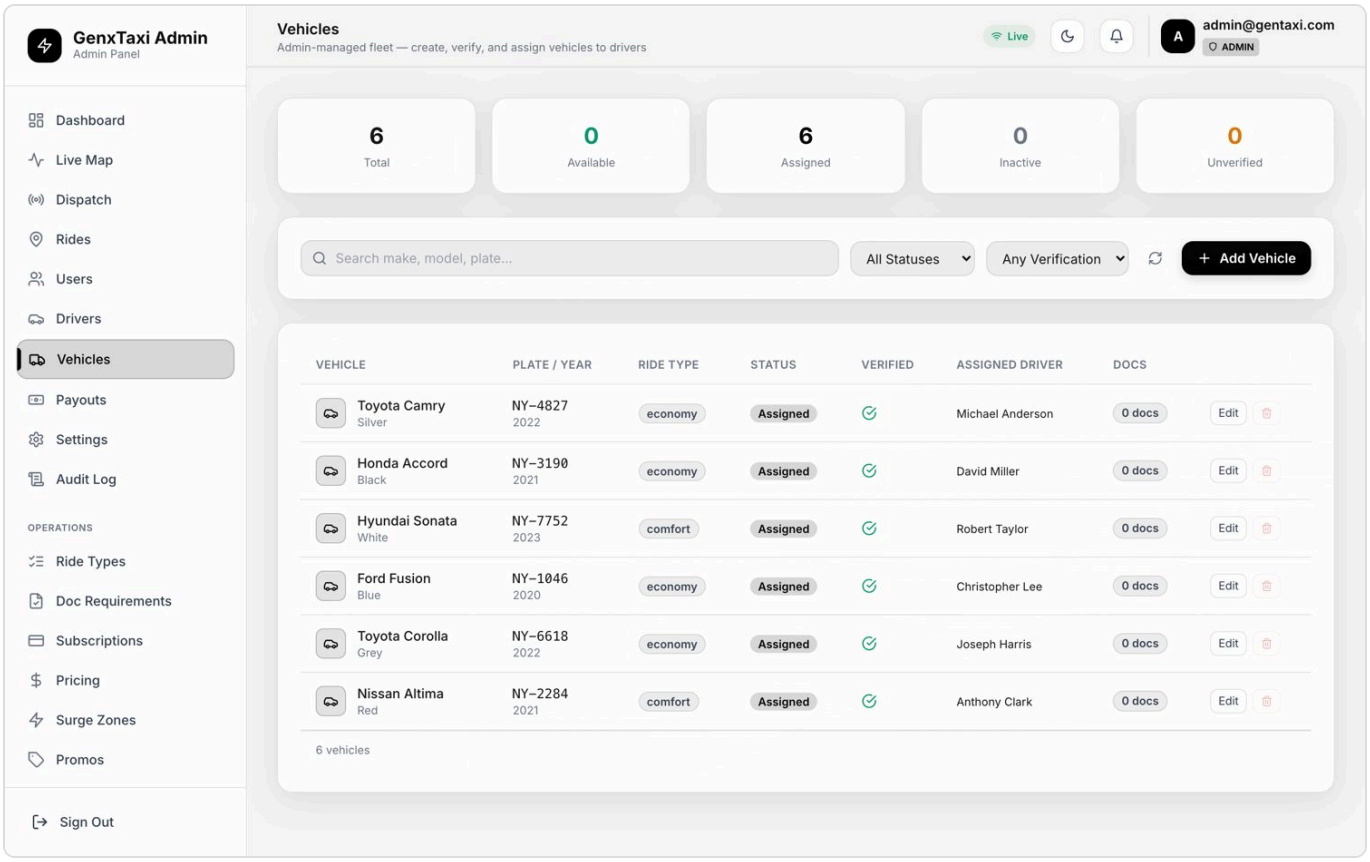

Feature	What it does
Riders	Searchable list, ride count and rating per rider, details panel, and block / suspend / ban actions.
Drivers	Approval workflow (approve, reject, request re-submission, suspend), document review, vehicle details, ratings and earnings.
Vehicles	Create, verify and assign vehicles to drivers.
Rides	Every ride with route, driver, fare and status; filters by status; full ride details and fare breakdown.

4.3 Pricing, promotions and money

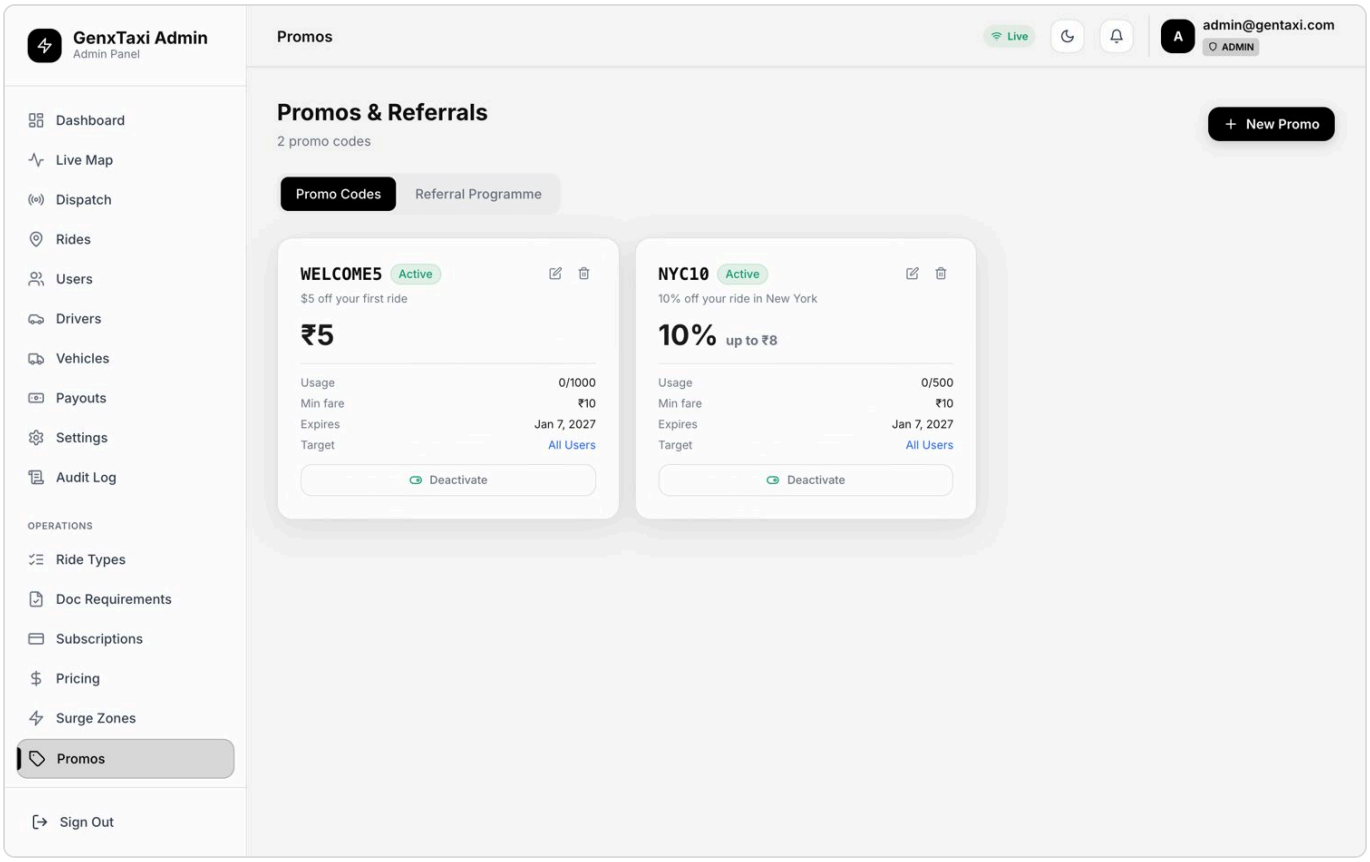

Feature	What it does
Pricing engine	Set base fare, per-km and per-minute rates, minimum fare, cancellation fee, tax and the platform/driver revenue split per ride type.
Surge zones	Draw geofenced zones with automatic or manual multipliers, live monitor and special events.
Promo codes & referrals	Percentage or fixed discounts with limits and expiry; referral programme.
Ride types	Configure categories (Economy, Standard, SUV/XL, Premium, Bike) and eligible vehicles.
Driver subscriptions	Plans for zero or reduced commission and subscriber tracking.
Payouts	Driver earnings, payout requests, approval and transaction history.

4.4 Safety, compliance and configuration

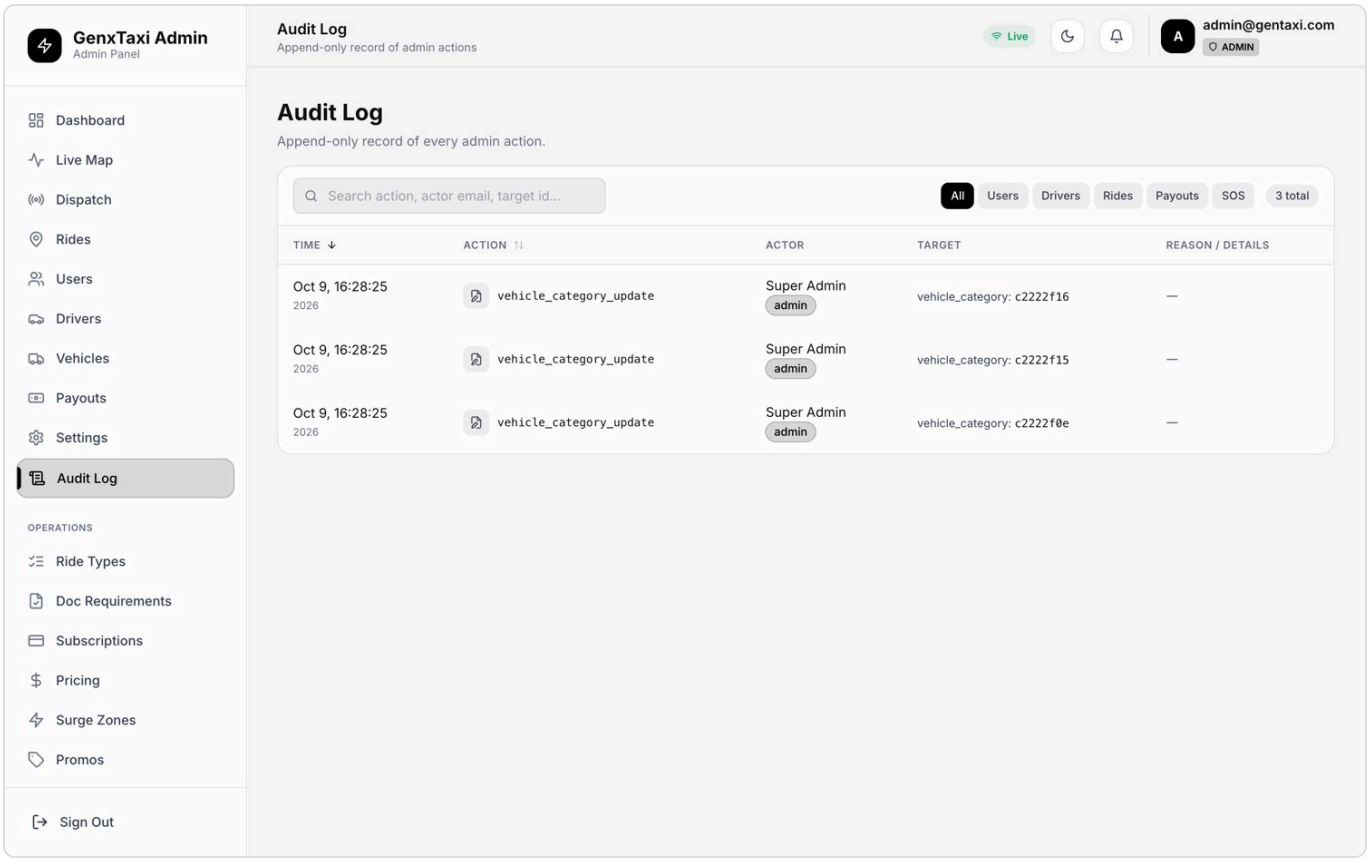

Feature	What it does
SOS management	SOS alerts appear instantly on the live map with location; staff triage and resolve with notes.
Document requirements	Choose which documents drivers must submit (required / optional, expiry).
Audit log	Record of admin actions for accountability.
Integrations	Configure maps, payments, SMS, email, push notifications, call masking, storage and analytics providers; secrets are stored encrypted.
Dispatch settings	Control the driver search radius.
Branding & dark mode	App branding page and a light/dark admin theme.

5. Platform-wide Capabilities

Area	Capability
Real-time	Live driver location, instant ride offers, status updates and chat between rider, driver and admin.
Safety	Pickup safety code, SOS with emergency-contact SMS and live tracking link, masked calling, escalation of unresolved alerts.
Payments	Cash, card and wallet; Stripe and Razorpay supported; promo discounts; refunds handled by admins; driver payouts.
Notifications	Push, SMS and email with editable templates; in-app notification centre; broadcast messages.
AI features	Support chatbot (answers FAQs, checks ride status, books or cancels with rider confirmation, escalates to a human), driver feedback insights, and demand forecasting to inform surge pricing (advisory).
Languages & themes	English, French and Arabic (right-to-left); light and dark mode.
Scale & reliability	Cloud-hosted backend with caching, health checks and rate limiting.

Additional capabilities in the platform

The platform also includes foundations for scheduled rides, loyalty tiers, corporate accounts and invoicing, in-app advertising, disputes handling and privacy data export. These are built into the backend; their management screens are being rolled out.

6. Feature Checklist

Area	Feature	Status
Rider	Phone login, registration	Live
	Booking, fare estimate, promo codes	Live
	Live tracking, driver details, safety code	Live
	SOS, emergency contacts, share trip, cancel	Live
	Ratings, history, receipts	Live
	Wallet & card top-up	Needs payment-gateway keys
	Saved places, preferences, dark mode	Live
	AI support assistant	Live (requires AI services online)
Driver	Login, onboarding, documents, vehicle	Live
	Online/offline, ride requests, navigation	Live
	Trip flow with safety code, earnings summary	Live
	Earnings, history, wallet, withdrawals	Live
	Subscription plans	Live
	Scheduled availability, AI feedback insights	Live
Admin	Dashboard, analytics, reports	Live
	Live map, dispatch, SOS management	Live
	Riders, drivers, vehicles, rides	Live
	Pricing, surge zones, promos, ride types	Live
	Payouts, subscriptions	Live
	Integrations, document requirements, audit log	Live
	AI operations, knowledge base, handoff inbox	Live (requires AI services online)

Notes. Screenshots show sample New York test data. Amounts are displayed in ₹ (INR). Payment gateways, SMS and email providers need the client's own account keys to be activated. Features, screens and labels may evolve as the product is refined.
